

# Trojanix

WHITEPAPER

# Abstract

**Trojanix is inspired by Elon Musk's failed attempt to save Twitter and is built on the Binance Smart Chain.**

Launched in November 2022, Trojanix is on a mission to restore freedom of expression on the Internet for all its users. Trojanix is the only social media platform that does not censor its users, thus creating a space for the truth.

All transactions are stored on the Binance Smart Chain. Users have complete control over their accounts and data, same as their crypto tokens.

Trojanix's token, abbreviated by TJX, is used by users on the platform to validate user tweets and thus their opinions. A post with more approval, thus more donated TJX tokens is ranked higher than lower rated opinions. Further users can buy other goods and services on the Trojanix Marketplace.

A new crypto birthed by members of the decentralised online community.

Trojanix is a revolutionary social media platform which gives back the rights of freedom of speech and expression to their users.

# Disclaimer

Trojanix, including but not limited to the overall project, token, website, smart contracts and any app presented in this concept paper, is not a licensed, unlicensed or exempt financial or payment service of any kind or in any jurisdiction. Any terminology used in the whitepaper, on the website or within the app is intended as a basic reference only, without any effective or legal meaning of the same terms in a regulated and/or financial environment.

Trojanix is a fully decentralized and collaborative project and has no owners, shareholders, promoters, marketers, managers, directors or other figures or entities exercising any form of governance; the Trojanix Smart Contracts are open source, security cleared, permanent and not alterable in any way.

The Trojanix Token is a pure utility token in any jurisdiction and cannot be considered a security or otherwise a regulated token of any kind, is in no way e-money and/or a fiat or asset-backed stablecoin, whether global or limited in scope.

This website and whitepaper do not in itself constitute a contract or contractual agreement of any kind, is not an invitation, solicitation or offer to invest in Trojanix or to acquire or use its Trojanix Tokens in any manner and with the expectation of profit in any form.

Each user of Trojanix agrees that prior to and after accessing and/or reading this whitepaper, the website and using any part or element of Trojanix (including the Trojanix Tokens (TJX) contained therein), he/she will seek appropriate technical, administrative, regulatory and legal advice.

He/she acknowledges, that access to, acquisition of, or use of blockchain and/or crypto systems, tokens, platforms, software, interfaces including Trojanix involves a high degree of risk and further acknowledges with full disclaimer to any Community Member directly or indirectly participating in Trojanix that any type of loss, up to and including total loss, may occur.

# Values

## Values we foster at Trojanix

### Transparency

Trojanix is decentralized and supported by its community of enthusiasts. We encourage open communication and believe trust, transparency and community are the 3 pillars to a successful project.

### Community

Trojanix is one of the fastest growing and most loved communities in crypto. We strive to include everyone from around the globe.

### Trust

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security efforts. Trojanix has been audited.

### Longevity

By promoting our values, we are well equipped to weather any market times together with our community. Trojanix is definitely in it for the long haul. We came to stay!

# How to Buy

## Step 1 – Create a wallet

Create a metamask wallet using either a desktop computer or an iOS / Android mobile device.

## Step 2 – Go to Bitmart.com

Sign in or create a new account on bitmart.com. Don't forget to verify your account.

## Step 3 – Get some USDT

In order to buy the Trojanix Token (TJX), you have to buy or deposit USDT at Bitmart.

## Step 4 – Trade USDT/TJX

Use the search function and look for the USDT/TJX trading pair. Now you can trade the Trojanix Token (TJX).

# Tokenomics

## Contract:

0xc1d6841a49C304FF81955dcf62a27641f7dbf9e3

## Total Supply:

999,999,999,999,999,999,999,999

## Ticker:

TJX

## Network:

BNB Smart Chain

# Vesting

## Vesting Schedule

Of the total supply of 999 Quadrilles tokens, 90% are locked for a period of 10 years.

This will reduce market price manipulation and secure investor interest.

After the first year, 10% of the total tokens will be unlocked each additional year to enable all tokens to be in circulation after year 10.

Only the 10% pool reserved for staking is not vested because it will be distributed over the years to users who want to participate in the staking option.

## Vesting Plan

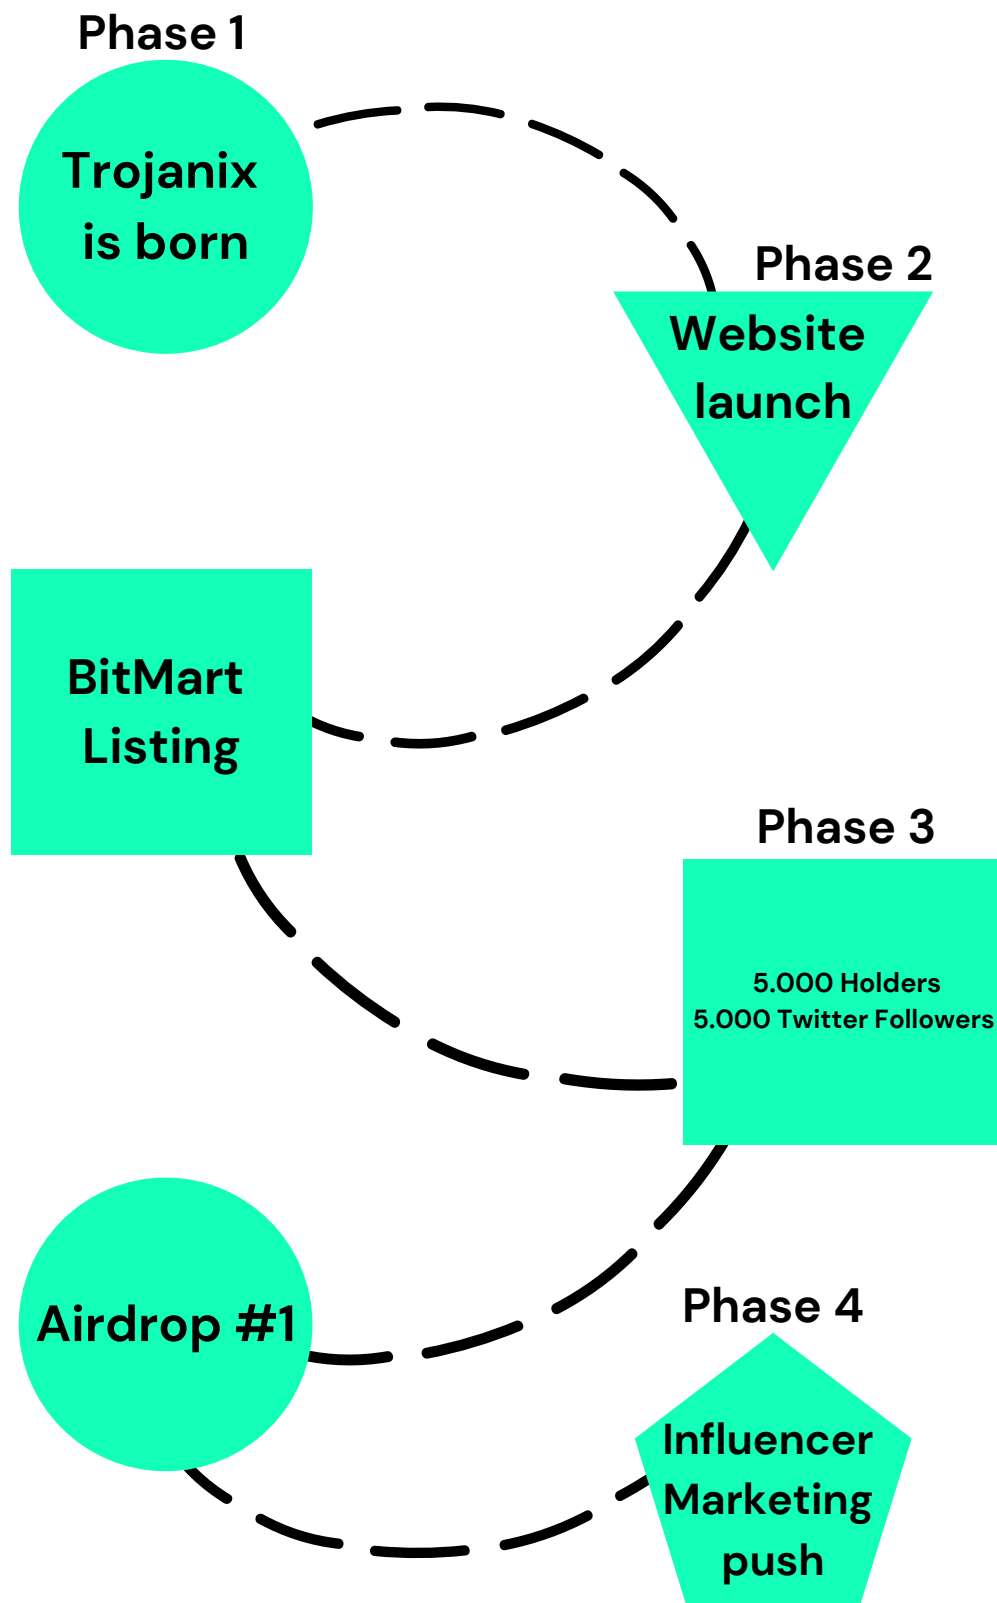

The 10% tokens unlocked each year will be distributed and released to the different sectors of Tokenomics, on a percentage basis.

An example: 50% of the tokens are reserved for the ICO. 10% of it, so 5% of the total amount, will be released from it every year.

Another way tokens can circulate early is by being used by users of the Trojanix platform to accredit other users' posts. This also describes the governance mechanism of the platform. Only after a user has used the token via the platform is it activated and can be sold via exchanges. With this mechanism, we promote the use of the platform and thus the token, which in turn is in the interest of investors.

# Roadmap

# Closing Words

**Thank you!**
